

# SPORTS BETTING 101

## TERMINOLOGY

• **MONEYLINE** - To win the game straight up without the point spread. These wagers will include odds instead of a “spread”

### EXAMPLE:

101 Team A-130      \$130 to win \$100 = \$230 Total Return  
102 Team B +110      \$100 to win \$110 = \$210 Total Return

- **PARLAY** - Two or more selections on the same ticket
- **JUICE** - The amount charged by the Sportsbook for taking the wager or the “vig”
- **PUSH** - When an event ends with no winner or loser for wagering purposes (event ends in a “tie”)
- **ACTION** - The wager is accepted (valid)
- **COVER** - To win by more than the point spread
- **BETTING NUMBER** - or “rotation number” the number associated with each team in order to place a wager. The betting number for each wager will be to the left of the team/wager on the betting sheets and odds TVs
- **SPREAD** - Used to even the odds between two unevenly matched teams

### EXAMPLE:

Team A-3 points vs Team B

For you to win the bet, Team A would have to win by MORE than 3. If they win by less than 3, the guest loses the bet.

If they win by exactly 3 then it is a push and your original wager is returned. If 101 Team A wins by 4 or more, you win.
